DE.AUTO

CHAPTER 1

MADE EASIER

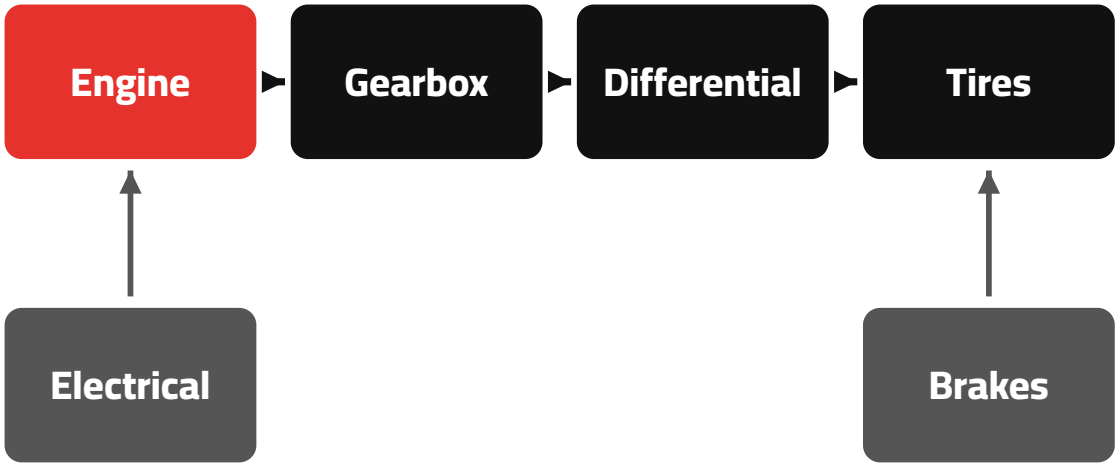

HOW A CAR WORKS

The simple version

DE.AUTO — Because knowledge is power, and cars are passion.

• The idea in a flash

A car is a team of six systems, and each one hands off to the next.

Just 5 things

1. 🔥 The engine makes the power.
2. ⚙️ The gearbox and differential deliver it to the wheels.
3. 🛞 The tires are what touch the road.
4. 🛑 The brakes turn motion into heat.
5. 🔋 The electrics start the engine and control it.

• 5 words are enough

Word		What it means
Engine		Makes the power.
Gearbox	Transmission	Sends the power to the wheels.
Differential	Diff	Lets the wheels spin at different speeds.
Tires		Touch the road.
Alternator		Charges the battery.

🎯 Test yourself

🎯 Challenge 1 **Which part actually touches the road?**

A) Brakes B) Tires C) Differential

🎯 Challenge 2 **What charges the battery while you drive?**

A) Starter B) Alternator C) Fuses

✅ **Answers:** 1) Tires. 2) Alternator.
