DE.AUTO

CHAPTER 2

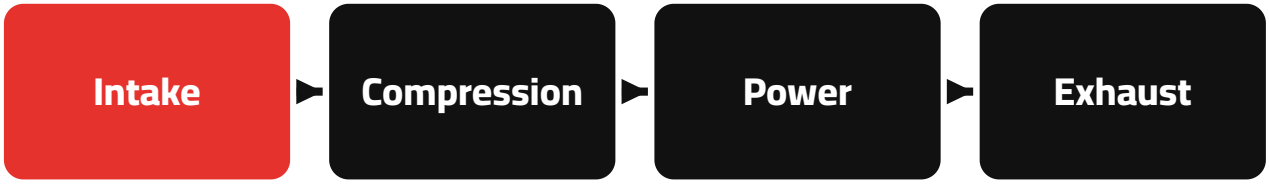

MADE EASIER

THE ENGINE

The simple version

• The idea in a flash

An engine breathes: suck, squeeze, bang, blow.

Just 5 things

1. 🌬️ It pulls in air and fuel.
2. 💥 The spark ignites the mixture.
3. ⬇️ The piston goes up and down.
4. 🔄 The crankshaft turns that into rotation.
5. 🛢️ Oil protects it from friction.

• 5 words are enough

Word	What it means
Piston	Moves inside the cylinder.
Cylinder	Where combustion happens.
Crankshaft	Turns the motion into rotation.
Spark plug	Makes the spark.
Torque	Pushing force.

🎯 Test yourself

🎯 Challenge 1 **Which part makes the spark?**

A) Crankshaft B) Spark plug C) Filter

🎯 Challenge 2 **How many strokes are in the cycle?**

A) 2 B) 6 C) 4

✅ **Answers:** 1) Spark plug. 2) 4.
