DE.AUTO

CHAPTER 5

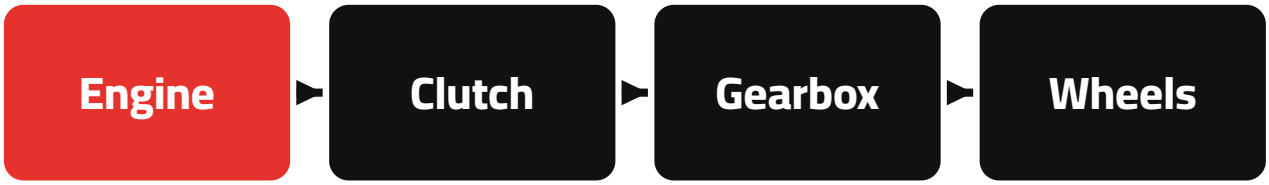

MADE EASIER

THE TRANSMISSION

The simple version

The idea in a flash

The gearbox decides how much the wheels turn compared with the engine.

Just 5 things

1. 🔢 Tall gears are for speed, short gears are for launching.
2. 🦶 A manual gearbox needs a clutch.
3. 🌀 An automatic shifts by itself.
4. 📈 A CVT has no fixed gears.
5. 🛢️ Gearbox oil needs servicing.

• 5 words are enough

Word		What it means
Gear		One shifting ratio.
Clutch		Disconnects the engine from the gearbox.
CVT		A gearbox with no fixed gears.
DCT	Dual-clutch	Two clutches and fast shifts.
Gear oil		Protects the gears.

🎯 Test yourself

🎯 Challenge 1 **Which gearbox has no fixed gears?**

A) Manual B) DCT C) CVT

🎯 Challenge 2 **What does the clutch do?**

A) Disconnects the engine from the gearbox B) Cools the engine

C) Charges the battery

✅ **Answers:** 1) CVT. 2) It disconnects the engine from the gearbox.
