DE.AUTO

CHAPTER 6

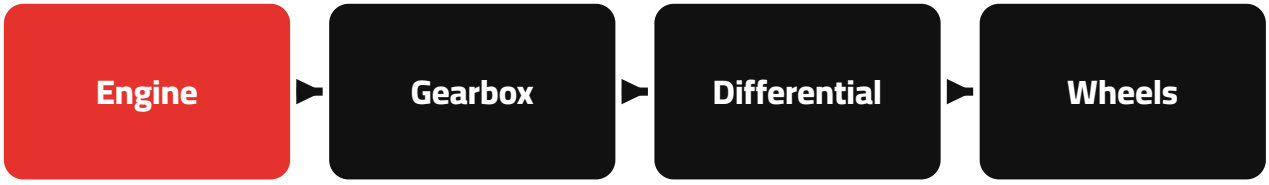

MADE EASIER

DRIVE SYSTEMS & TORQUE

The simple version

• The idea in a flash

Power is useless until it reaches the ground.

Just 5 things

1. ⬅️ **Front-wheel drive: the front tires pull.**
2. ➡️ **Rear-wheel drive: the rear tires push.**
3. 🧗 **All-wheel drive shares the power between more wheels.**
4. 🔒 **An LSD stops one wheel from spinning on its own.**
5. 🐢 **Gulf off-road slang “heavy double” usually means 4L, the slow low-range gear.**

• 5 words are enough

Word		What it means
Differential	Diff	Lets the wheels spin at different speeds.
AWD	All-wheel drive	Shares the power automatically.
4WD	Four-wheel drive	For off-road, and you pick the mode.
LSD	Limited-slip diff	Stops one wheel from spinning freely.
Diff lock		Locks the differential fully.

🎯 Test yourself

🎯 Challenge 1 **What locks the differential completely?**

A) LSD B) Diff lock C) ABS

🎯 Challenge 2 **What does “heavy double” usually mean in Gulf off-road talk?**

A) New petrol B) 4L, the slow gear C) Brakes

✅ **Answers:** 1) Diff lock. 2) 4L, the slow gear.
