DE.AUTO

CHAPTER 8

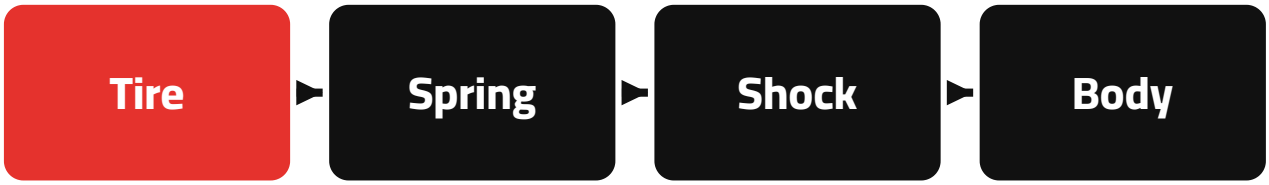

MADE EASIER

SUSPENSION & HANDLING

The simple version

The idea in a flash

The suspension keeps the tire on the ground and keeps the passengers comfortable.

Just 5 things

1. 🌀 The spring carries the weight.
2. 🛢️ The shock calms the spring down.
3. 🔩 Bushings soak up vibration.
4. ⚖️ Stiffer isn't always better.
5. 🔍 A noise or a vibration? Get it checked.

• 5 words are enough

Word		What it means
Spring		Carries the car's weight.
Shock	Damper	Stops the bouncing.
Bushing		Rubber that soaks up vibration.
Dive		The nose drops under braking.
Body roll		The car leans in corners.

🎯 Test yourself

🎯 Challenge 1 **What calms the spring's bouncing?**

A) Spark plug B) Shock absorber C) Gearbox

🎯 Challenge 2 **Is a stiffer suspension always better?**

A) Yes B) It makes no difference C) No, it's a trade-off

✅ **Answers:** 1) The shock absorber. 2) No, it's a trade-off.
