DE.AUTO

CHAPTER 9

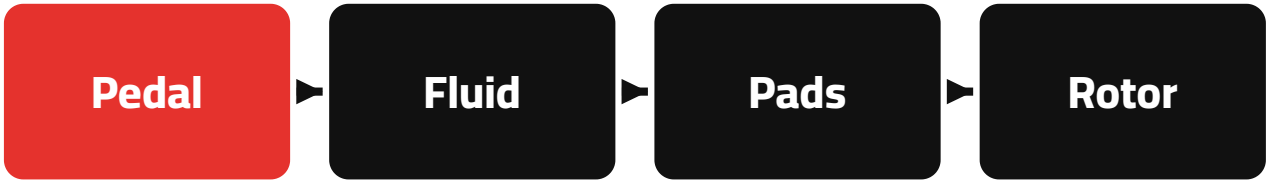

MADE EASIER

BRAKES & SAFETY

The simple version

• The idea in a flash

Brakes turn motion into heat.

Just 5 things

1. 💧 Fluid pressure carries your foot's force.
2. 🧱 The pads rub against the rotor.
3. 🔥 Too much heat weakens the brakes.
4. 🧠 ABS stops the wheels locking.
5. 🌀 ESC helps keep the car stable.

• 5 words are enough

Word		What it means
Pads		Rub against the rotor.
Rotor	Disc	A disc that spins with the wheel.
Caliper		Squeezes the pads.
ABS	Anti-lock braking	Stops the wheels locking.
Fade		Brakes weaken from heat.

🎯 Test yourself

🎯 Challenge 1 **What stops the wheels locking?**

A) Alternator B) Filter C) ABS

🎯 Challenge 2 **What causes brake fade?**

A) Too much heat B) The paint colour C) Cold water

✅ **Answers:** 1) ABS. 2) Too much heat.
