DE.AUTO

CHAPTER 12

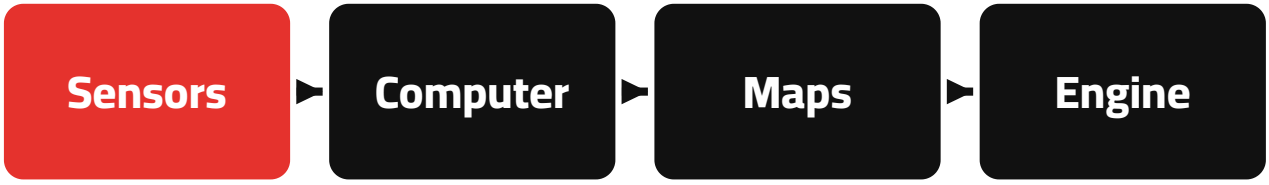

MADE EASIER

ECU TUNING

The simple version

• The idea in a flash

A car is made of parts, and the tune is its brain.

Just 5 things

1. 🧠 The computer decides fuel and spark.
2. 🗺️ Maps are tables that set the behaviour.
3. 🏷️ Stage 1, 2 and 3 are workshop labels.
4. 📈 Measuring and logging come first.
5. ⚠️ A bad tune can damage the engine.

• 5 words are enough

Word		What it means
ECU	Computer	The car's brain.
Map		A table of values.
Dyno		A machine that measures power.
Stage		A label for a level of modification.
DTC	Fault code	A message about a problem.

🎯 Test yourself

🎯 Challenge 1 **What is the ECU?**

A) The car's computer | B) A type of oil | C) A type of tire

🎯 Challenge 2 **Is "Stage 2" an official number?**

A) No, it's a workshop label | B) Yes | C) It comes from the manufacturer

✅ **Answers:** 1) The car's computer. 2) No, it's a workshop label.
