DE.AUTO

CHAPTER 13

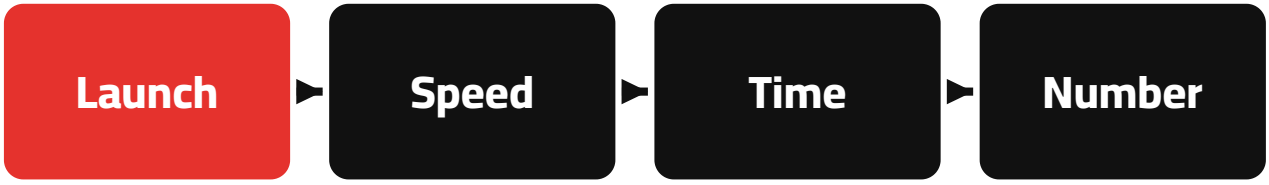

MADE EASIER

RACING & PERFORMANCE

The simple version

• The idea in a flash

Numbers don’t lie, but they need context.

Just 5 things

1. ⏱️ 0–100 measures the launch.
2. 🏁 Top speed measures staying power.
3. 📏 The dyno measures power.
4. 🌡️ Conditions change the number.
5. 🏟️ Racing belongs on the track, not the street.

• 5 words are enough

Word	What it means
0–100	Launch time.
Quarter mile	A short-distance race.
ET Elapsed time	The time to cover the distance.
Dyno	Measures power.
Launch control	The computer holds the revs.

🎯 Test yourself

🎯 Challenge 1 **What does ET mean?**

A) Time to cover the distance | B) A type of petrol | C) Weight measurement

🎯 Challenge 2 **Why can the same car post different numbers?**

A) Its colour | B) Conditions and equipment | C) Its name

✅ **Answers:** 1) Time to cover the distance. 2) Conditions and equipment.
